

ABSTRACT OF THE DISCLOSUREMETHOD FOR ASSAYING A BIOLOGICAL OR CHEMICAL SAMPLE

The invention relates to a method for assaying a biological or chemical sample comprising the following steps:

- illuminating the sample (10) by means of a light
5 beam (17) from a source (11),
- producing an image including the image of the beam (18) diffused by the sample (10),
- analysing the image according to reference criteria,
- 10 - extracting information specific to the light/sample beam interaction,
- calculating the assay.
